Sub: Requisition for approval for adopting Smart board Technique in Teaching

Respected Madam,

We are writing to request your permission to incorporate the use of smart boards in our teaching methods. We believe that this innovative technology will enhance the quality of education and create a more interactive and engaging learning experience for our students.

Smart boards provide an opportunity to create a dynamic and interactive classroom environment. The technology allows teachers to incorporate multimedia elements, such as videos, images, and interactive activities, into the lessons. This method will enable students to better understand the concepts covered in class and make learning more engaging and memorable.

We kindly request your permission to integrate the use of smart boards into our teaching methods. We assure you that we will follow all necessary protocols and guidelines to ensure the technology is used safely and effectively in our classrooms.

Thank you for considering our request. We look forward to hearing from you soon.

Sub: Seeking Approval for adopting Theme based learning

Respected Madam,

I am writing to request your permission to adopt a new teaching method for the core paper "Perspectives in Education". After conducting research and consulting with other educators, I have decided to implement theme-based learning in my classroom.

Theme-based learning is an approach where students learn through the exploration of a central theme or topic. This method promotes critical thinking, problem-solving, and collaboration among students. I believe that this approach will enhance the learning experience for my students and help them to better understand the concepts covered in the core paper.

I would like to assure you that I have thoroughly researched and planned the implementation of this teaching method. I will ensure that the core objectives of the paper are met and that students will still be assessed according to the prescribed assessment guidelines. I kindly request your permission to proceed with the implementation of theme-based learning in my classroom.

Thank you for your understanding and support.

Sub: Seeking approval for adopting Padlet for teaching, learning, and evaluation

Respected Madam,

I am writing to request your permission to adopt Padlet as a tool for teaching, learning, and evaluation for the papers that I am handling. We believe that this innovative approach will enhance the quality of education and create a more engaging and interactive learning experience for our students. Padlet is a web-based tool that allows for collaborative activities, such as discussions, brainstorming, and presentations. It also enables teachers to create and share online assignments and quizzes, which can be evaluated quickly and efficiently. I believe that incorporating Padlet into our teaching methods will enable us to create a more personalized learning experience for each student.

I kindly request your permission to adopt Padlet as a tool for teaching, learning, and evaluation for the papers that I am handling. I assure you that we will follow all necessary protocols and guidelines to ensure that the approach is implemented effectively and safely in our classrooms.

Thank you for considering our request. I look forward to hearing from you soon.

Respected Madam,

Sub: Seeking approval for adopt blended learning with cooperative and collaborative learning strategies

I am writing to request your permission to adopt blended learning with cooperative and collaborative learning strategies for the core paper Perspectives in Education and Skill oriented course – Arts and Aesthetics . We believe that this innovative approach will enhance the quality of education and create a more engaging and interactive learning experience for our students.

Blended learning involves the integration of online learning materials and traditional classroom instruction. It offers numerous benefits, such as flexibility, accessibility, and increased student engagement. Cooperative and collaborative learning strategies will also be incorporated into our teaching methods, where students work together in small groups to achieve a common goal.

I believe that adopting these methods will enable us to create a more personalized learning experience for each student, and cater to different learning styles. It will also promote critical thinking, problem-solving, and communication skills.

I kindly request your permission to adopt blended learning with cooperative and collaborative learning strategies. I assure you that we will follow all necessary protocols and guidelines to ensure that the approach is implemented effectively and safely in our classrooms.

Thank you for considering our request. We look forward to hearing from you soon.

Yours Sincerely,

Smart Board teaching learning

The traditional methods of teaching are no longer sufficient to meet the modern-day requirements of the education system. The college has recognized this and adopted a more advanced teaching method by incorporating smart board technology into classrooms. This report aims to discuss the adoption of smart board teaching in college.

Smart board teaching involves the use of interactive whiteboards that provide a more engaging and immersive learning experience for students. The smart board technology is equipped with various features, such as touch-screen controls, multimedia support, and internet connectivity, that enable teachers to present and teach their lessons in a more dynamic and interactive way. Hence the Smart board teaching learning is incorporated for all the pedagogy subjects from the academic year 2017-2018.

Theme Based Learning

To encourage participative learning of students, different teaching strategies were adopted. One among them was Theme based learning. In the core paper 'Perspectives in Education', there were units on 'Eastern philosophers and Western philosophers. To enable a better understanding of the concept, the student teachers were divided into eight teams. Each team has been allotted an educational philosopher viz. Mahatma Gandhi, Sri Aurobindo, Swami Vivekananda, Tagore, Froebel, Maria Montessori, Rousseau and John Dewey. Three members in each unit prepared for the parade of philosophers in which a student acted as the educational philosopher and another one as his student. The third person is the supportive member. Each team performed the role play depicting the educational principles, curriculum, teaching methods and instructional materials advocated by the philosopher. This technique enabled the learners to internalize the content well and provide a platform to concretize their assimilation of the learning concept. The rest of the members in each team took up poster presentation where the contributions of the philosophers were beautifully put up in the form of concept map and the students explained them in detail. These activities facilitated the students to absorb the learning content and through articulation their understanding was further reinforced. The cooperative performance developed team spirit among the students and eased the students to compare and contrast the educational philosophies of the thinkers.

Adoption of Padlet and Edmodo

In the year 2019, the institution adopted two Information and Communication Technology (ICT) tools, namely Padlet and Edmodo, to enhance collaborative activities and learning management. This report aims to discuss the adoption of these ICT tools and their impact on the institution. The adoption of these ICT tools has had a significant impact on the institution. Padlet has enabled students to collaborate and share their ideas effectively, which has improved the quality of assignments and projects. The use of Edmodo has made it easier for teachers to manage the learning process, monitor student progress, and provide timely feedback. The adoption of these ICT tools has also reduced the use of paper, making the institution more environment.
